

Smile please.

LED sensor-switched light with  
camera and intercom system

## L 600 CAM - Smart. Safe. Intelligent.

**Always know who is at the front door – regardless of where you are, whether out shopping or in the living room – is that possible?** Of course it is possible - with our new smart L CAM 600 communication light in conjunction with the **free app**. The attractive LED sensor-switched light does not just illuminate your entrance area, but also transmits razor-sharp images to your smartphone or tablet thanks to its high-quality camera. **No greater convenience, safety and peace of mind.**

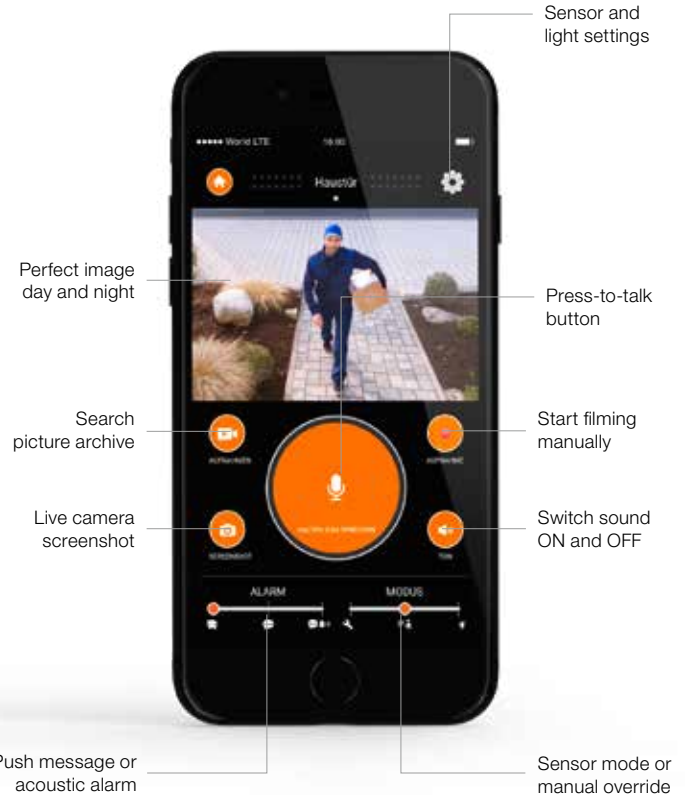

## L 600 CAM - Details that please.

**The L 600 CAM outdoor light provides more than light and security. Much more.** The sensor-switched light with durable aluminium enclosure and high-quality opal glass shade is the first Wi-Fi-based camera light from STEINEL and is always in touch with you via app. As soon as the 180° infrared motion sensor with a reach of 10 m detects movement, the light switches ON when it's dark and, if you want it to, sends a message to your mobile device. The precision-adjustable camera transmits images of your entrance area to your smartphone or tablet via Wi-Fi and provides

you with the option of interacting. You can see and hear exactly what is happening outside your front door, and can communicate from your smartphone or tablet via the built-in intercom unit. As soon as movement is detected, the images taken are saved to an SD card installed in the light and can be viewed on your mobile phone all very conveniently; with data being saved locally, it cannot get onto the Internet unintentionally. Thanks to the warm-white light with 3000K and 781 lm, and an output of 14.3W, even the darkest figures are always well illuminated.

The **free** STEINEL CAM app is available for:

## L 600 CAM.

All under control. All in one app.

Can be installed in just the same way as a "normal" light and is easy to operate. With the free STEINEL CAM app, you are always in the picture and ready to take action. You see what's going on outside your front door. Can speak directly to anyone standing there via the intercom system. Search events by date and time of day. Access various alarm settings. Adjust the sensor. Regulate light level settings in line with your needs. More convenience, more safety and more peace of mind. The L 600 CAM from STEINEL.
